

OXYGEN CYLINDERS

Portable oxygen cylinders are small tanks of compressed oxygen, varying in height and weight. Using a shoulder bag, backpack or small wheeled cart allows you to easily bring your oxygen with you while you are away from home.

OXYGEN CONSERVING DEVICES (OCD)

An OCD attaches to any portable cylinder and conserves the amount of oxygen in your cylinder by delivering oxygen only when you breathe in. This extends the lifespan of your portable oxygen cylinder, allowing you to travel longer and use either smaller or fewer portable cylinders.

PORTABLE OXYGEN CONCENTRATORS (POC)

A POC works like a home oxygen concentrator by concentrating oxygen from room air. They come with a rechargeable battery and two different power cords, so they can be plugged in at home or in most car's auxiliary outlets. POCs may help clients leave home for extended periods of time and are approved for use onboard many commercial aircraft.

NOTE: A respiratory assessment is required to determine if this device meets your oxygen needs.
